Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Norwood et al. (US 6,561,841) in view of Schenkel et al. (US 5,524,463).

Regarding claim 1: Norwood et al. disclose connector assembly having visual indicator which comprises securing said physically mated primary and secondary devices; and means for determining that said first and second inter-connection attachment means are securely mated (col. 3, lines 45-65). Norwood et al. do not teach a first inter-connection attachment means in physical association with said first device having one predefined non-rectangular geometric shape; a second inter-connection attachment means in physical association with said second device, having a second predefined non-rectangular geometric shape wherein said second shape physically mates with said first geometric shape. However, Schenkel et al. disclose theft deterrent device to facilitate easy protection of large irregularly-shaped goods comprising a first inter-connection attachment means in physical association with said first device having one predefined non-rectangular geometric shape; a second inter-connection attachment means in physical association with said second device, having a second predefined non-rectangular geometric shape wherein said second shape physically mates with said first geometric shape (fig. 2, col. 2, lines 59-66, and col. 3, lines 25-44). Therefore, it would have been obvious to one of

Art Unit: 2632

ordinary skill in the art at the time the invention was made to utilize the teaching of Schenkel et al. in the system of Norwood et al. in order to provide coupling between electronic devices.

Regarding claim 2: Norwood et al. disclose indicating the status of the completion of the secure attachment of said secondary device to said primary device (col. 5, lines 50-54).

Regarding claim 3: Norwood et al. disclose wherein said detecting means are associated with both devices and in communication with both device's individual inter-connection attachment means (col. 2, lines 39-44).

Allowable Subject Matter

3. Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Hillman et al. [U.S. 2002/0022397] disclose connector.

b. Storcel [U.S. Pat. 4,290,662] discloses connector assembly with visual tactile and audible indication.
